December 2, 1991

TO: Minerals File

FROM: Tony Gallegos, Reclamation Engineer *adg*

RE: Site Inspection, Interstate Brick Company, Montello Mine, M/003/004, Box Elder County, Utah

Date of Inspection: November 20, 1991  
Time of Inspection: 1430 -1500  
Conditions: Overcast, cold  
Participants: Wayne Hedberg, Tony Gallegos, DOGM

According to Division files, this site had not been inspected by DOGM staff since 1988. A brief unscheduled inspection of the site was performed while in the vicinity.

There are currently no directional signs or company signs on the road to the site. There are no gates at the mine site or any signs identifying the mine operation. There are two areas associated with this mine. The first and smaller site encountered while driving up the road, was not inspected during this visit. The upper site contains a highwall approximately 80-100 feet. A large stockpile of white clay and a truck scale are other significant features at the site. Photographs were taken to document the current status of the site.

The reclamation surety for this operation is in the form of a Board Contract in the sum of \$286,584 covering 40 acres of disturbance. The 1988 annual report listed 16 acres of existing mine disturbance. More recent annual reports have been received, but the disturbed acreage was not included.
